The Unfunded Actuarial Accrued Liability is the excess of the Actuarial Accrued Liability over the Actuarial Value of the Assets.

The Actuarial Accrued Liability is the portion of the present value of future plan benefits reflecting projected credited service and salaries determined by the actuarial cost method based upon the plan's actuarial assumptions and not provided for at a valuation date by the actuarial present value of future normal costs. The normal cost is the portion of this present value which is allocated to the current valuation year.

The Actuarial Value of Assets is the asset value derived by using the plan's asset valuation method which is a method designed to smooth random fluctuations in asset values. The objective underlying the use of an asset valuation method is to provide for the long-term stability of municipal contributions.
